Part 3 Strategic framework \ 3.7 Theme 5: Brisbane's CityShape

3.7.1 Strategic outcomes

Reason for change: To introduce a new neighbourhood plan for the suburbs of Nathan, Salisbury and Moorooka

1. The strategic outcomes for the CityShape theme are:
 - a. The CityShape theme states the outcomes for Brisbane's urban form and structure that integrates in a spatial context the four themes that underpin Brisbane's emergence as a new world city; namely its globally competitive economy, outstanding lifestyle, clean and green leading environmental performance and highly effective transport and infrastructure networks. Brisbane's urban form and structure is spatially represented on the following strategic framework maps:
 - i. **SFM-001 Sub-regional Context Strategic Framework Map;**
 - ii. **SFM-002 Brisbane CityShape 2031 Land Use Strategic Framework Map;**
 - iii. **SFM-003 Brisbane Selected Transport Corridors and Growth Nodes Strategic Framework Map;**
 - iv. **SFM-004 Brisbane Greenspace Strategic Framework Map;**
 - v. **SFM-005 Brisbane Transport Strategic Framework Map.**
 - b. Brisbane's City Centre is a larger and more powerful economic engine for growth of the city which:
 - i. accommodates a wide range of commercial, government, retail, employment, residential, entertainment, services, recreation, community and cultural facilities, provided in a high-quality urban environment which also offers highly urban lifestyle opportunities;

- ii. is a focal point for Brisbane's outstanding lifestyle that offers an urban metropolitan way of life based on its memorable precincts and their relationship to the Brisbane River, the 24-hour economy, access to major community, cultural and education facilities, significant places of cultural heritage and world-class recreation; all of which is enjoyed in an easily accessible, high-quality pedestrian environment;
- iii. comprises three corridor hubs at the edges of the City Centre (Fortitude Valley, Woolloongabba and Milton) that act as gateways to the Selected Transport Corridors upon which its Growth Nodes are based. This ensures seamless transition points and connections between these different parts of the city (shown below in Figure b).
- iv. the City Centre and three corridor hubs sit within the Inner City area that is comprised of selected transport corridors and growth nodes, Suburban Living Areas, Special Centres, transport infrastructure and urban open spaces. This Inner City area is the highest concentration of employment, cultural facilities and residential development in the City.

Development is consistent with an approved structure plan that is prepared in accordance with the Structure planning planning scheme policy and which demonstrates how the proposed development will:

- be designed to maximise residents safety and mitigate site constraints including bushfire risks;
- include a mix of dwelling houses, dual occupancy and multiple dwelling at a range of styles and densities with a maximum of 25 dwellings per hectare;
- incorporate internal movement networks including roads and pedestrian pathways that provide safe and legible movement throughout the site and connect the precinct with adjoining land uses;
- provide necessary infrastructure including storm water infrastructure; and private recreation areas.

Note—A structure plan prepared in accordance with the Structure planning planning scheme policy can assist in demonstrating achievement of this outcome and is a useful tool to integrate development layout with all relevant spatial attributes as addressed in overlays and neighbourhood plans.

AO24.1

Development provides a maximum of 25 dwellings per hectare.

AO24.2

Note—A structure plan prepared in accordance with the Structure planning planning scheme policy can assist in demonstrating achievement of this outcome and is a useful tool to integrate development layout with all relevant spatial attributes as addressed in overlays and neighbourhood plans.
