#### **Proposed citywide amendment – More Homes, Sooner – Low-medium density residential design**

At its meeting on 9 December 2025, Brisbane City Council proposed a tailored amendment – More Homes, Sooner – Low-medium density residential design to *Brisbane City Plan 2014* to support more homes to be built sooner (the proposed amendment). The proposed amendment applies city wide to land in the Low-medium density residential zone and the Low density residential zone.

The purpose and general effect of the proposed amendment is to facilitate housing diversity and supply through:

- combining two existing Low–medium density residential zone precincts into one new zone precinct, with no change to the location or number of properties in the zone.
- increasing building height to 3 storeys in the new zone precinct and allowing up to 4 storey multiple dwellings on sites near frequent public transport or centres.
- reducing the minimum lot size in the new zone precinct to 120m<sup>2</sup> where a site is more than 400m walking distance from frequent public transport or centres, and applying specific design and servicing requirements for these lots.
- simplifying development assessment in the new zone precinct to enable more code assessable development for multiple dwellings and small lots and reducing the level of assessment for dual occupancies to accepted development.

A change is also proposed in the Low density residential zone, to expand the area where the existing minimum lot size of 300m<sup>2</sup> applies.

Copies of the proposed amendment are available for inspection and purchase from the Brisbane City Council Library and Customer Service Centre, Level 1, North Quay Podium, Brisbane Square, 266 George Street, Brisbane.
