

Honeyeater Street Park sports facilities project

October 2026

We're delivering new sports park facilities in Upper Kedron to provide more space to play, train and connect.

Project overview

We're delivering a new sports park facility at Honeyeater Street Park in Upper Kedron. The project will give the local community more space for sport and recreation close to home.

The project will build on the park's existing facilities and provide new spaces for local sport, training and community use.

This project will deliver:

- a new cricket field
- an amenities block.

Project timing

Work is expected to start in **late October 2026** and be completed by **mid-2027**.

Construction works on the amenities block will commence first, with work on the cricket field to follow.

Works on the amenities block will take place between 7am and 5pm, Monday to Friday.

We'll provide more details about the cricket field works later in the year.

Funding

This project is funded with the support of the Queensland Government's Games On! Grassroots Infrastructure Program.

Why is this work happening?

This project will help meet growing demand for local sport and recreation facilities in Upper Kedron.

The new facilities will support local training, games and community use, while giving residents more opportunities to be active close to home.

What does this mean for me?

Once works start:

- **the playground will remain open**
- the footpath adjacent to the new amenities block may require intermittent closures
- part of the park will be fenced off for the site compound and work zone
- access for people walking and riding through the park will be maintained where practicable
- up to 6 existing trees will require removal or on-site replacement.
