Montague Road Transport Study

Have your say

November 2024

Dedicated to a better Brisbane

Brisbane City Council and the Queensland Government have developed a draft transport study for the Montague Road corridor in West End and South Brisbane and we want your feedback.

What is the study?

The Montague Road Transport Study creates a vision for future transport transformation along this growing corridor.

This study identifies overarching transport priorities for Montague Road, as well as opportunities for potential improvements in key areas on Montague Road to help guide effective future transport investment.

Why are we doing this study?

As the area continues to grow, so does the demand for transport along Montague Road. It is important that we set a vision now, for how we could invest in transport along this corridor into the future, to help more people get where they want to go.

Whether you walk, ride, catch a bus, or drive, we are planning for a connected, integrated and reliable transport system along Montague Road.

We analysed community feedback alongside our technical data to develop a draft transport study that sets a vision for more sustainable transport options and improves safety for everyone along Montague Road.

Project funding

This planning study is a joint initiative of Brisbane City Council and the Queensland Government.

Queensland Government

Dedicated to a better Brisbane

Have your say

We are inviting you to have your say on the draft transport study for the Montague Road corridor to help us finalise this transport vision.

You can provide feedback by completing an online survey or speaking with the project team at our upcoming information session.

Scan the QR code to find out more about the study and provide feedback. You can also visit brisbane.qld.gov.au and search 'Montague Road transport study'. **Survey closes at 11.59pm on Sunday 15 December 2024.**

You can speak with the project team at our community information session on:

- Saturday 23 November 2024, 6am – 11am at the West End Markets.

Montague Road Draft Transport Study – Vision and Priorities

Our vision is for Montague Road to be an inclusive and vibrant subtropical corridor, bringing together and connecting the peninsula to support a thriving and active community. Montague Road will offer accessible and convenient connections to allow residents, visitors and workers the choice in safe and reliable travel modes.

Montague Road will balance diverse transport needs and be positioned to support high-frequency bus services. It will feature generous paths embellished with trees and greenery, making it an enjoyable place to walk, ride and rest.

To support this vision, we have identified 3 priorities that draw on strategic directions, technical input and community feedback.

Liveability and economic growth

We aim to support liveability and local economic growth by providing for diverse needs along the road corridor.

Improving access and connectivity

Our goal is to facilitate access to public transport, walking and riding to support the community in choosing preferred travel modes.

Supporting active travel

We aim to support an increase in trips taken by walking, cycling and e-mobility.

What we heard from the community

In late 2023, we invited the community to share their feedback on current travel patterns, experiences, challenges and opportunities for travel improvements along Montague Road.

The feedback showed the community priorities are to:

- improve safety with more pedestrian crossings, dedicated bike paths and separating different modes of transport
- create better streetscape amenities with more shade and greenery
- reduce congestion with slower speed limits, traffic calming measures and safety improvements for turning vehicles at key intersections
- improve public transport with more reliable travel times.

You can read more about the draft transport study and what we heard from the community by scanning the QR code on the front page or visiting brisbane.qld.gov.au and searching 'Montague Road transport study'.

Next steps

After this consultation period, we will analyse community feedback and engage with other government agencies to finalise this transport study. When finalised, the study will be available on Council's website.
