

February 2025

McLennan Street Suburban Corridor Modernisation project

Albion / Lutwyche / Woolloowin

Project update

Since our last community update in September 2024, we have implemented the outcomes of our long vehicle detour signage review and changed some signs in the area to encourage long vehicles to travel via Lutwyche Road instead of McLennan Street where possible.

We're now pleased to share the detailed design for safety, accessibility and amenity upgrades along McLennan Street.

What do the safety, accessibility and amenity upgrades involve?

As part of this project, we will be:

- installing pedestrian refuge splitter islands on Bale Street, Wakefield Street and Grove Street
- upgrading kerb ramps at the new refuge islands on Wakefield Street and Grove Street and at the existing refuge island on Marne Road
- relocating the existing pedestrian refuge on McLennan Street between Conan and Florrie streets to between Conon Street and Marne Road
- installing a new streetlight on McLennan Street near Conan Street, at the relocated pedestrian refuge island
- installing 8 landscaped traffic islands
- completing minor turfing improvements
- painting new line marking, including yellow 'No Stopping' lines.

On-street parking will not be permitted in spaces marked with yellow 'No Stopping' lines.

Please see the project plan on the next page for more details.

Why are we doing this?

Improvements as part of this project will:

- provide safer and more accessible pedestrian crossing points
- delineate traffic and reduce corner cutting
- encourage slower and safer vehicle movements
- improve amenity by adding greenery to the street.

These works are based on community support from consultation in 2023 and are part of Council's Suburban Corridor Modernisation (SCM) program. This program focuses on minor works at intersections to improve safety for all road users.

Next steps

We are committed to keeping the community informed and will provide more information before construction starts in early 2025.
