

October 2026

Pathway lighting works

Upcoming works at Kedron Brook Bikeway, Enoggera

What works are coming up?

We are removing 8 existing solar powered lights and installing 32 new mains powered lights along the Kedron Brook Bikeway in Shand Street Park, between Shand Street and Bauhinia Avenue.

When will this work take place?

Start	Late November 2026
Finish	April 2027, weather and site conditions permitting
Time and day	7am - 5pm, Monday to Friday

What does this work include?

Works will involve:

- installing 32 new light poles with mains powered LED luminaires
- removing 8 existing light poles with solar powered luminaires
- underground drilling and vacuum excavating to install light pole foundations, conduits and electrical pits
- minor tree trimming where required to accommodate the new lights
- electrical cable works and turfing.

The existing lighting will only be removed once all the new lighting is installed and fully operational.

Please see an indicative layout map on the back page for more details about where the new lighting will be installed.

Why are we doing this?

Bikeway lighting helps improve public safety and visibility for people walking and riding and ensures our public areas are appropriately lit at night.

Lights are positioned at specific locations to optimise illumination on the bikeway and to comply with Australian Standards.

The Kedron Brook Bikeway is a popular active travel corridor and installing this lighting is part of our commitment to help keep bikeway users and our community safe.

What does this mean for me?

Residents and park users may notice:

- deliveries of machinery, equipment and materials to site
- construction vehicle movements with reversing alarms and flashing lights
- construction noise
- small work setups including traffic cones and/or bollards.

There may be short delays for pathway users while work is underway. Please follow directions of our site crew to ensure your safety is maintained at all times.
