

November 2024

Wilston Road Suburban Corridor Modernisation

Community engagement

Project overview

Council is inviting feedback about your experiences walking, riding and driving along **Wilston Road, between Newmarket Road and Mina Parade**.

Your feedback will be used in conjunction with our technical analysis to create a design for potential future access, safety and amenity improvements as part of our Suburban Corridor Modernisation program.

Future construction will be dependent on future budget allocation and city-wide priorities.

Have your say

The online survey is now open and will close at 11.59pm on Sunday 19 January 2025.

To complete the survey or contact us to provide feedback:

Visit brisbane.qld.gov.au and search '**Wilston Road Suburban Corridor Modernisation**'

3178 5413 (business hours)

Why are we doing this?

Council's Suburban Corridor Modernisation projects identify practical options to improve access, safety and amenity along suburban streets for people walking, riding and driving.

This program focuses on minor works to improve intersections, pedestrian crossing points, visibility and encourage slower and safer vehicle movements.

What has been investigated on other sections of Wilston Road?

Wilston Road, between Days Road and Raymont Road

Council engaged with residents and implemented a right-turn restriction from Raymont Road into Wilston Road between 7-9am, Monday to Friday in March 2024.

Wilston Road, between Mina Parade and Daisy Street

Council investigated this area in response to community feedback about pedestrian footpath connectivity in 2023. There are no changes planned at this time due to road corridor constraints.

Open level crossing

Changes to the open level crossing between Murrell Street and Mina Parade are outside of the scope of this project as this is a Queensland Government asset.

Council implemented a right-turn restriction from Wilston Road into Murrell Street between 7am-7pm in July 2022 to address safety concerns about vehicles queueing across the open level crossing.
