

October 2025

## Cambridge Parade, Melville Terrace and Arnold Street intersection improvements – Manly

We're pleased to let you know construction is set to begin mid-November to improve safety at this intersection, following community consultation completed in late 2024.

### When will this work take place?

Safety improvements at the Cambridge Parade, Melville Terrace and Arnold Street intersection are scheduled to start mid-November and are expected to take around 4 weeks to complete, weather and site conditions permitting.

To minimise disruption, works will be completed at night when traffic volumes are lowest. This will ensure everyone's safety and reduce the overall time to complete the works.

<b>Start</b>	Mid-November 2025
<b>Finish</b>	Late 2025, weather and site conditions permitting.
<b>Time/day</b>	Night works 7pm to 5am, Sunday to Thursday.

### What does this work include?

As part of these works, we will:

- install a raised speed platform that accommodates cars with boat trailers on Cambridge Parade
- revise the kerb alignment on Melville Terrace to slow traffic and improve safety for pedestrians
- install new traffic islands on Melville Terrace and Cambridge Parade
- replace the stop signs with give way signs on Melville Terrace and Arnold Street
- remove 5 informal on-street parking spaces along Cambridge Parade
- formalise 30 car parking space along Cambridge Parade, between Melville Terrace and Stratton Terrace, with line marking.

 Turn the page over to see the project plan.

### What does this mean for me?

During construction, you may notice:

- increased noise, truck movements, low level dust and vibration
- changed traffic conditions, including detours, minor traffic delays, reduced speed limits and temporary lane closures
- traffic management and signage will be onsite to direct people walking.

We encourage anyone who lives, works or travels through the work area to subscribe to receive project updates.

The safety improvements will:

**increase awareness** of the 40km/h speed zone

**enhance visibility** improving safety for all road users.
