

May 2025

McLennan Street, Albion / Lutwyche / Woolloowin Suburban Corridor Modernisation

Start of construction

What works are coming up?

Following our last community update in February 2025, we're pleased to advise works to improve safety, accessibility and amenity along McLennan Street will start soon.

When will this work take place?

| | |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Start | Mid-May 2025 |
| Finish | Early July 2025, weather and site conditions permitting |
| Time and day | Initial works will take place during the day between 7am to 5pm, Monday to Friday. Night works will commence from early June, between 7pm to 5am, Sunday to Thursday. |

Some works are required to be undertaken at night when traffic volumes are lowest, to ensure the safety of workers and road users and to minimise disruption.

What does this work include?

As part of these works, we will be:

- installing pedestrian splitter islands on Bale Street, Wakefield Street and Grove Street
- upgrading kerb ramps at the new refuge islands on Wakefield Street and Grove Street and at the existing refuge island on Marne Road
- relocating the existing pedestrian refuge on McLennan Street between Conan and Florrie streets to between Conon Street and Marne Road
- installing a new streetlight on McLennan Street near Conan Street, at the relocated pedestrian refuge island
- relocating bus stop 17 Marne Road further south on McLennan Street
- installing 8 landscaped traffic islands
- completing minor turfing improvements
- painting new line marking, including yellow 'No Stopping' lines, where on-street parking will not be permitted to ensure safe sightlines and to ensure lanes are wide enough for traffic to safely pass.

Why are we doing this?

Improvements as part of this project will:

- provide safer and more accessible pedestrian crossing points
- delineate traffic and reduce corner cutting
- encourage slower and safer vehicle movements
- improve amenity by adding greenery to the street.

These works are based on community support from consultation in 2023 and are part of Council's Suburban Corridor Modernisation (SCM) program. This program focuses on minor works at intersections to improve safety for all road users.

What does this mean for me?

If you live in or are travelling through the area, you may notice:

- increased noise, dust, vibration and vehicles
- changed traffic conditions, including footpath and lane closures, and reduced speed limits
- traffic controllers and signage onsite.

We would like to thank you for your patience while these important works are undertaken.
