

Pallara District Sports Park

Start of construction – October 2026

What works are coming up?

We're starting construction on the new Pallara District Sports Park in Pallara from mid-November 2026.

When will this work take place?

Start	Mid-November 2026
Finish	Early 2028, weather and site conditions permitting
Time and day	6:30am to 6:30pm, Monday to Friday, some Saturdays, as required

What does this work include?

The original concept included 2 playing fields and an area reserved for a future third field.

We're excited to now deliver all 3 playing fields as part of the project, as well as other community sport and recreation features, including:

- a clubhouse with public amenities, creating a central hub for players, families and visitors
- on-site parking and dedicated bus drop off to make access simple
- sports lighting and irrigation to support evening use and quality playing surfaces.
- welcome open green spaces and an area for a future playground and picnic facilities site.

You can see more information on our project plan over the page.

Vegetation

We've worked hard to reduce the impact on existing vegetation as much as possible. While up to 11 trees will need to be removed, the work will be planned and supervised in consultation with a qualified arborist.

As part of the project, more than 150 new trees are expected to be planted, providing greenery and shade for years to come.

Why is this work happening?

This project is an exciting step forward for Pallara, creating a new destination for sport, recreation and community life.

As the suburb continues to grow, the new district-level sports park will provide the facilities and green spaces needed to support active lifestyles, bring people together and create more opportunities for sport, play and outdoor recreation close to home.

The park will become the home of St George Willawong Football Club, helping build a strong local sporting community and creating more opportunities for people to get involved, stay active and connect. The club was selected following a formal tender process.

What does this mean for me?

To keep everyone safe during construction, **the entire park will be closed and fenced throughout the work.**

If you live in or are travelling through the area, you may also notice:

- increased vehicle movements, construction activity and noise during work hours
- minor traffic changes on Van Dieren Road, including stop go traffic control when trucks are entering and exiting the site.

We value your patience and cooperation while we undertake this important project.
