Road resurfacing requires a number of stages in order to achieve a high-quality outcome. To ensure the best quality product and minimise risk of damage to vehicles, Brisbane City Council requires all vehicles to be removed from the roadway during working hours.

Sometimes these works need to be completed at night or during weekends, particularly on major roads due to the high volume of traffic using these roads during the day. Some works require the use of loud machinery and Council acknowledges these works may impact local residents.

It is always a balancing act to minimise disruptions to both residents and road users, and Council appreciates the community’s patience as we work to create smoother, safer suburban streets.

**STAGE 1 – Preparation works**

The first stage of works includes the profiling/milling of the road surface and the retrieval of asphalt for recycling. New asphalt is then placed in areas identified as needing repair.

During this stage there will be increased noise and some dust near the worksite.

**STAGE 2 – Bitumen seal**

A bitumen seal is not always required, however when necessary it is applied before the final asphalt resurfacing.

This stage involves minimal noise however residents and businesses may notice a short-term odour while the bitumen is sprayed.

Following this process the road will have some loose stones remaining on the surface. The bitumen seal needs to be left for 3-7 days to cure before the final surface can be placed.

**STAGE 3 – Final asphalt resurfacing**

The final stage of resurfacing the roadway involves placing and rolling the final layer of asphalt.

Noise during this stage is limited to vehicle noise and, similar to the bitumen seal, there is a short-term odour as the new surface is applied and rolled.

**STAGE 4 – Post asphalt resurfacing works**

Once the road has been resurfaced Council will reinstate line markings, traffic signal loops and access to infrastructure pits, valves and fire hydrants. This work is usually completed within six weeks of the resurfacing being completed.

Further information

If you have any questions on the road resurfacing process, please call Council on (07) 3403 8888. For further information on Council’s road resurfacing program visit www.brisbane.qld.gov.au and search ‘road resurfacing’.
