Dedicated to a better Brisbane

# ADVICE on post-immunisation reactions in children

All the common adverse reactions following immunisation are typically mild and temporary and treatment is not usually required. If the adverse reaction is severe or persistent, or if you are worried about your child's condition, contact your nearest doctor or hospital.

VACCINE	SITE OF IMMUNISATION	POSSIBLE REACTIONS	WHAT TO DO
<b>Rotavirus</b> Dose 1: 6-14 weeks (given with 2 month vaccines) Dose 2: 10-24 weeks (given with 4 month vaccines)	Oral	<ul style="list-style-type: none"> <li>One-to-three per cent chance of diarrhoea or vomiting in the next seven days.</li> <li>Be aware of intussusception in vaccinated and unvaccinated children.</li> </ul>	<ul style="list-style-type: none"> <li>Keep hydrated.</li> </ul>
<b>Pneumococcal</b> (2, 4, 12 months)  <b>DTPa/IPV/Hib/HepB</b> (diphtheria, tetanus, pertussis, inactivated poliomyelitis vaccine, <i>Haemophilus influenzae</i> type b and hepatitis B) (2, 4, 6 months)  <b>DTPa</b> (diphtheria, tetanus, pertussis) (18 months)  <b>DTPa/IPV</b> (diphtheria, tetanus, pertussis and inactivated poliomyelitis vaccine) (4 years)  <b>Men ACWY</b> (meningococcal ACWY strains) (12 months)  <b>Hib</b> ( <i>Haemophilus influenzae</i> type b) (18 months)	<input type="checkbox"/> R arm <input type="checkbox"/> L arm <input type="checkbox"/> R leg <input type="checkbox"/> L leg  <input type="checkbox"/> R arm <input type="checkbox"/> L arm <input type="checkbox"/> R leg <input type="checkbox"/> L leg  <input type="checkbox"/> R arm <input type="checkbox"/> L arm  <input type="checkbox"/> R arm <input type="checkbox"/> L arm  <input type="checkbox"/> R arm <input type="checkbox"/> L arm	<ul style="list-style-type: none"> <li>Small hard lump at injection site – may persist for some weeks or months.</li> <li>Muscle aches (IPV only).</li> <li>Localised pain, redness and swelling at injection site.</li> <li>Low-grade temperature (fever).</li> <li>Irritable, crying, unsettled and generally unhappy.</li> <li>Drowsiness or tiredness.</li> </ul>	<ul style="list-style-type: none"> <li>No treatment needed.</li> <li>Give paracetamol if temperature is above 38.5 degrees.</li> <li>Give extra fluids to drink.</li> <li>Do not overdress baby if hot.</li> </ul>
<b>MMR</b> (measles, mumps and rubella) (12 months)	<input type="checkbox"/> R arm <input type="checkbox"/> L arm <input type="checkbox"/> R leg <input type="checkbox"/> L leg	<ul style="list-style-type: none"> <li>Small hard lump at injection site – may persist for some weeks or months.</li> </ul> <p><b>Seen 5-12 days after vaccination:</b></p> <ul style="list-style-type: none"> <li>low-grade temperature (fever) lasting 2-3 days, head cold/runny nose, cough/puffy eyes</li> <li>faint red rash (not infectious)</li> <li>drowsiness or tiredness</li> <li>swelling of salivary glands.</li> </ul>	<ul style="list-style-type: none"> <li>No treatment needed.</li> <li>Give paracetamol, if needed.</li> <li>Give extra fluids to drink.</li> <li>Do not overdress baby if hot.</li> </ul>
